K.C.S. THREE WAY ACTIVE CROSSOVERS

K.C.S. multichannel electronic crossover, with time correction, has been specifically designed for use in cinema theaters.

FEATURES

Three way active crossover for tri-amplification, for the three channels behind the screen, equipped with:

- Crossover frequency preset depending on model.
- High frequency compensation curve.
- Time Delay for 180, 270, 360, 450 and 540 degree delay to balance the distance between high frequency driver and subwoofer.
- Backup by-pass in case of active crossover failure, with the three screen subwoofers acting as a total system.

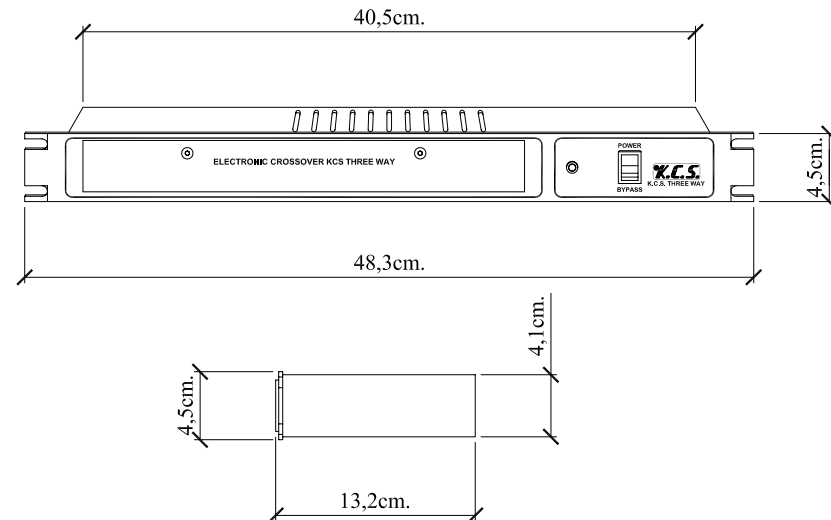

MODELS

- K.C.S. 380/1800-3 (with crossover frequency at 380 and 1800Hz).
- K.C.S. 400/1800-3 (with crossover frequency at 400 and 1800Hz).
- K.C.S. 300/2500-3 (with crossover frequency at 300 and 2500Hz).
- K.C.S. 500/2500-3 (with crossover frequency at 500 and 2500Hz).

DIMENSION / WEIGHT

48,3 x 4,5 x 13,1 cm.

Weight: 2,5 Kg.
